The laws in Chapter 7 of Title 47 are, for the most part, nearly 50 years old. The primary purpose of this bill is to remove obsolete language, to consolidate redundant language, to replace outmoded language, to provide consistent language, to clarify various authorities, and to establish a more cohesive structure to this chapter.

Following are the amendments to Section 31 and a brief explanation of the substantive changes:

- Removes obsolete "bond" language
- Corrects scrivener's error which occurred when this section was amended in 2 different bills in 2008, one of which left out the December 31, 2008, date in paragraph 6 of subsection A.
- Clarifies that vehicles covered by commercial policies are not included in the online insurance verification process.
- Removes language related to license plate design which is not part of the online insurance verification process.
