Following are the amendments and a brief explanation:

Subsection A
Paragraph 1: Since the Department of Public Safety is the lead agency for the online verification system, changes language to require that the Oklahoma Tax Commission (and the Insurance Department) cooperate with the Department of Public Safety, rather than vice versa.

Paragraph 3: Adds language that allows for individualized methods of inquiry and response as agreed to by the Department of Public Safety and individual insurance carriers. This allows for the most flexibility in creating and updating the DPS-maintained database.

Paragraph 6: Changes the implementation date for the verification system from July 1 to December 31, 2008. The date change was suggested and requested by some insurance companies.

Paragraph 11: Makes all information exchanged or generated in relation to the verification system not subject to the Open Records Act, that is, confidential. This request was suggested and requested by insurance companies
